

InterpreXer™ Server

Robust Speech Application Engine to 'voice enable' Enterprise Applications in the cloud or in your network. InterpreXer™ fully implements the W3C VoiceXML 2.1 specification.

Applications in the Cloud:

Unified Communications: Click 2 Dial, Presence.

Business Transactions: Financial, Banking, Hospitality, Healthcare.

Contact Center and CRM: Auto Attendants, Collections, Notifications and Verification Call backs.

Enterprise Cloud: Mobile sales force, stock levels & status tracking.

Social Media: Voice Chat, Voice-To-Text, Voice Broadcast, On-demand Conferencing, Web Callback (hidden phone #).

Entertainment & Utility: news and weather, TV listings, lead generation, driving directions.

Availability:

InterpreXer™ is **architected** to run standard VoiceXML applications **in the Cloud** or **in your network**. It can be deployed as part of Phonologies Voice Platform or as a standalone OEM Component in your existing IP infrastructure.

InterpreXer™ uses carrier grade FreeSWITCH® and is also available in modular components to suit OEM needs, with flexible licensing options for Windows and Linux OS.
